-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3751

1. Claims 1 and 6-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a track and coping assembly with a insert plate, does not reasonably provide enablement for a track and coping assembly without a insert plate. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Applicant argues at pages 1-2 of the response filed May 18, 2006 the examiner did not properly consider the declaration of Bruce Holmes. To the contrary, the declaration was fully considered, and its probative value weighed accordingly. Note the Office mailed February 14, 2006 at paragraph 2.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-17 are rejected under 35 U.S.C. 102(a/e) as being anticipated by Last '990.

The Last '990 reference discloses a track and coping assembly comprising: a coping 26 including a slot having an opening 42, an inner wall 31, an opposite inner wall 33, and a tab 32; a reversible track 11 including a first channel 16 having a first opening 17, a second channel 19 having a second opening 21, and two locking ledges 13; an insert wedge 34; a pulley 23; and a pulley housing 36, as claimed. Re claims 1 and 12, the openings 17,21 in Last are "adapted to receive" different rope/slider arrangements as discussed at column 5, lines 33-42, therein. Furthermore, these statements of intended use does not appear to impose any patentably distinguishing structure of the claimed assembly over that disclosed by Last.

Applicant argues at page 2 of the response the examiner should give probative value to the declaration of Bruce Holmes. The examiner agrees, and notes the declaration was fully considered, and its probative value weighed accordingly. Note the Office mailed February 14, 2006 at paragraph 5. Applicant argues at pages 2-3 of the response the "claims" require channels having different configurations. The examiner can not agree as the presence of such a limitation has neither been

found in the "claims" by the examiner, nor pointed out by applicant.

4. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.

5. The grounds of rejection have been reconsidered in light of applicant's arguments, but are still deemed to be proper.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
